Education

2019-present **University of Nottingham**

MSci Computer Science, four year course.

Year 3: First (89%)

Dissertation (89% – awarded the year’s Best Dissertation Prize)

“Fugue, a Friendly Functional Programming Language with Holes.” I designed and implemented a functional programming language, named Fugue, with a novel type system based on Hindley-Milner. The language compiles to an enhanced lambda calculus and supports interactive programming to an extent using holes, and I devised a heuristic for suggesting and prioritising possible hole fills.

Compilers (96%)

Knowledge, Representation & Reasoning (91%)

Programs, Proofs & Types (97%)

Others: (72%, 93%, 78%)

Year 2: First (87%)

Software Engineering Group Project (89%)

“Surreal Numbers and Games.” Using Haskell, we explored the usage of John Conway’s surreal number system for general game-playing AI to produce a program that could perform well against human players even on games it had never seen. Specifically, it worked with 2-player perfect information games, and included a Haskell API for users to define their own games.

Algorithms, Correctness & Efficiency (92%)

Advanced Functional Programming (87%)

Operating Systems & Concurrency (89%)

Others (89%, 86%, 81%, 80%)

Year 1: First (91%)

Mathematics for Computer Scientists (97%)

Databases & Interfaces (93%)

Programming & Algorithms (96%)

Others (90%, 90%, 88%, 81%, 88%)

2015-2019 **The Thomas Hardy School, Dorchester**

A-Levels

Mathematics: *A**; Further Mathematics, Computer Science, and Physics: *AAA*

Experience

2022-present *HackSoc Nottingham*, President

- I am responsible for the society, including the community itself and its reputation, but also organisation and planning. I give talks and workshops, and have retained my Graphics Officer duties.

2021-present *HackSoc Nottingham*, Lead organiser for HackNotts, our annual hackathon.

- I am responsible for the graphics, web development, logistics, finance, and general planning of the event.

2021-2022 *HackSoc Nottingham*, Development Secretary and Graphics Officer.

- I give a number of workshops and talks on tech-related topics each month.
- I maintain the society’s website and graphics.

2020-2021 *University of Nottingham*, A Computer Science mentor.

- I was assigned to a small group of first-year students to help them settle in to University.
- I ran a number of sessions with my group to help them with their first-year modules.

2018 *National Citizen Service*, Participant.

- As part of a team, raised money and restored a youth centre in Dorchester.

2017-2019 *Thomas Hardy School*, Ran the Programming & Robotics club.

- We taught a group of year 9 and GCSE students about programming, mainly through the context of robotics.

2017-2019 *Thomas Hardy School*, Volunteered at a number of STEM days.

- We ran half-day sessions teaching middle school students about programming and simple robotics using LEGO Mindstorm.

Skills & Interests

- Extensive experience in Haskell (>6 years), Python (>10 years), C, Go, JavaScript, Agda, and \LaTeX . Also Rust, Java, various LISPs, and numerous domain specific languages.
- Strong interest in many areas related to programming language theory, including type theory, compiler design/implementation, and interactivity in programming languages.
- Experience with systems programming, scientific computing in Python and MATLAB, full-stack web development, networking, multimedia (image processing, audio processing/synthesis, game development), and the design and implementation of programming language compilers.
- Strong interest in hackathons, both as an attendee and as an organiser.
- Interested in mathematics, especially where it overlaps with Computer Science, but also mathematical puzzles and games for their own sake.
- I enjoy playing, listening to, and creating music; I play the guitar and the piano. I also enjoy reading, and I am a long-time member of my University's Medieval Combat Society.

Awards & Achievements

2022 *Computer Science, University of Nottingham*, Best Individual Year Three Dissertation prize.

2022 *Computer Science, University of Nottingham*, High Achiever's Award (top 5 in my year.)

2021 *AstonHack 2021*, First place for my project, "Network over Rube Goldberg Machine".

2021 *Computer Science, University of Nottingham*, High Achiever's Award (top 5 in my year.)

2020 *HackNotts 2020*, Sponsored prize for my project, "The Haskelltron 2000".

2020 *Computer Science, University of Nottingham*, High Achiever's Award (top 5% in my year.)

2019 *Computer Science, University of Nottingham*, Silver Scholarship (a 25% tuition fee rebate each of my four years at University, so long as I achieve 80% in each.)

2019 *Thomas Hardy School*, Selected by my school to create an interactive exhibit for the local community's "50th Anniversary of the Moon Landing" event.

2019 *Thomas Hardy School*, Received my school's first ever Computer Science subject award.

2018 *United Kingdom Mathematics Trust*, Silver award in their Senior Mathematical Challenge.

2015 *Bournemouth University*, Second place out of hundreds of entries in a programming competition.
